

Environmental Policy Statement

At Quick Circuits, we understand the regulatory requirements involved in printed circuit board manufacturing and assembly; more importantly, we recognise the devastating impact our industry can have on the environment if best practices are ignored. Quick Circuits has a responsible commitment to being a green-minded company, with the following objectives:

- Realistic and achievable objectives and targets will be set with a view to reducing significant environmental impacts
- Continual improvement initiatives will be established, encouraged and maintained throughout the organization
- Prevention of pollution will be mandatory throughout the organization
- Waste minimization will be effected through more efficient processing and effective recycling strategies.
- All hazardous waste will be removed and disposed of by licensed authorities.
- All employees will receive basic environmental awareness training.
- The requirements of all environmental legislation in force, local, national and international will be regularly monitored to ensure continuing compliance.
- Relationships will be developed with suppliers and subcontractors with a view to mutual assistance regarding environmental concerns.

A copy of our environmental management manual is available upon request.
